Land of Unknown Side #1

The Gorgore

log of Ump the Great

This part of my log is dedicated to the species of Gorgore.

The Gorgore used to be a peaceful species...

But then the witch disappeared and the Gorgores became confused.

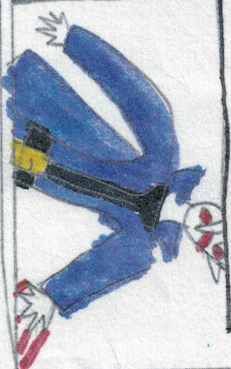

...flying under the twin suns like graceful birds.

Overtime they became somewhat peaceful again.

But an evil witch came and made the Gorgores...

But when provoked they can become very aggressive.

...twisted and hot like themselves.

No. 3

Phantom's

2022

Phantoms didn't
use to exist...

Poot!

But it is said that
spirits from the dark
domain...

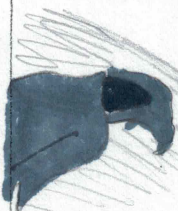

Went out of their
eternal night to
terrorize villages of
a long lost people.

As they terrorized and
ate they began to take
a form...

A form of a hooded
figure shrouded in
darkness...

Their form thickened
and morphed until
they were almost
mortal...

But, death comes
with mortality and
the spirits were getting
ever weaker

They took refuge in
the darkness from
whence they came
and sought help from
the new king

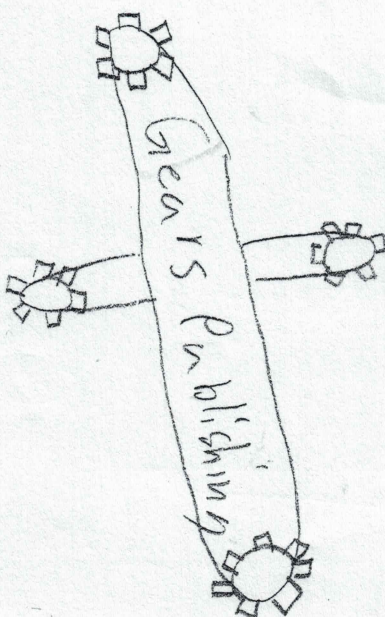

The king called upon
his dark powers
and created the
spirits into something...

...Almost unimaginable

Log of Unp the Great

No. 4 Unnamed Beasts

2022

Un-named Beasts are crosses between different creatures.

The Dark King used the Unknown Regions as an experimenting ground for his new powers

Delighted with his phantoms he decided to create more beasts.

He melded creatures together into things they never could have been before

zap!

Soon enough the Creature began to gather forces into intellect

They drove out the dark King

He sealed off the Region so that no one could get through not even the King himself.

But, it is said, that there is a key, hidden in Mt. Ashe, only accessible when the lava is low, that can unlock the gates.
